

# HTT-900

## Personal Role Radio

- Advanced SDR architecture
- Full-duplex conference
- Flexible ad-hoc networking
- VOX
- Real-time situation awareness

# Advanced Functions

## Multiple Call Modes

- Half-duplex intercom: Point to multipoint for voice.
- Full-duplex conference: Point to multipoint, support 6 people in the network to talk at the same time
- Ad-hoc networking conference: 3 hops voice, 3 hops data, intra-network grouping, through double PTT can choose the whole network or intra-group communication.

## Hand-free Communication

The HTT-900 personal role radio supports VOX. with VOX, soldiers don't need to press PTT to talk, which greatly improves communication efficiency and release soldier's hand from pushing PTT button.

## Flexible Grouping in Squad Team Network

In ad-hoc networking conference mode, the squad team can be flexibly grouped into 4 groups with sharing the same frequency for better mission coordination.

## Reliable Connection for Data and Voice

The HTT-900 personal role radio supports ad-hoc networking with fast self-forming, self-healing and dynamic topology, which frees the communication from terrain limitation, such as urban area, underground tunnel or mountainous forest. The communication distance in squad team can be extended 2-3 times by 3 hops voice relaying.

## Situation Awareness

The situation awareness application can be flexibly deployed on a ruggedized smart device which can be connected with HTT-900 personal role radio via WiFi and work with a smart device for efficient mission coordination. It supplies services such as battlefield information and intelligence sharing, team member position reporting with build-in GPS module and vital signs information monitoring via smart watch.

# Highlights

## High Security

- **Data Encryption**  
AES-256 software encryption and customized encryption.
- **Key Filling**  
The parameters can be injected to the HTT-900 personal radio through the parameter injection software running on computer.
- **Key Erasing**  
Support manual key erasing to ensure the security of communication parameters configuration in emergency situation. Those with a high authority level can remotely destroy the keys of a low-level authority through the situation awareness application.

## Compact and Rugged Design

- **Waterproof**  
2m water immersion for 1 hour, suitable for harsh battlefield environment
- **Ruggedized**  
Ruggedized design, complied with MIL-STD-810G.
- **Lightweight**  
Small and light, less than 350g with battery, easy to carry
- **Battery**  
18 hours battery life, suitable for long-term combat in the field.
- **Compact**  
Simple buttons design, easy to operation

# Specifications

Frequency Range	350-450MHz	Weight	≤350g(with battery)
Bandwidth	45kHz, 75kHz	Dimension(WxHxD)	≤60x240x38mm(with antenna)
Output Power	≤3W	Storage Temperature	-45°C to +65°C
Sensitivity	-118dBm@BW=45kHz; -110dBm@BW=75kHz	Operating Temperature	-30°C to +55°C
Data Interfaces	TTL serial port, WLAN and Bluetooth	Immersion	2m, 1h
Data Rate	≤60kbps	Environment Test Standard	MIL-STD-810G
Modulation Modes	2GFSK	Electromagnetic Compatibility Standard	MIL-STD-461F
COMSEC	AES 256		

# Standard Accessories

Antenna

battery

Charger

Adapter

# Optional Accessories

ruggedized headset

wireless PTT

carrying case
